

**CRO are pleased to be able to offer an introduction service to assist in the opening of your account with Barclays Bank PLC**

**AND we'll give £50.00 cash back once your account has been opened!**

Once your new company has been incorporated we will send all the relevant details and documents to Barclays along with your contact information. Barclays will then contact you within 48 hours of the company's incorporation.

A convenient time will be arranged for your welcome meeting at a branch of your choice, giving you the opportunity to meet your dedicated Barclays Business Manager and discuss your requirements. As they will already have most of your details this process will involve the minimum amount of paperwork or form filing on your part.

Three great reasons to open an account today:

1. Free business banking for up to 1 year
2. Free day-to-day support from the Barclays telephone team 24/7
3. £50.00 cash back courtesy of CRO once your account has been opened – straight to your account

To take advantage of this great offer simply select the Business Banking Offer option when you order your new company online.

**Please note:**

The cash back offer only applies to companies where all directors are UK residents who apply for their bank account through Company Registrations Online Limited and who open a Barclays Business Bank Account within 3 months of application.

Once your account is opened, please email your Barclays account number, sort code and company name to [banking@companyregistrations.co.uk](mailto:banking@companyregistrations.co.uk). £50.00 cash back will then be paid by direct transfer to eligible new accounts once Barclays have notified us that the new account was opened via our introductory service. This process may take up to 4-6 weeks.

Barclays will only open accounts for companies that are trading from the UK (have a UK trading address). The decision making process is outside the control of CRO and we cannot guarantee that the Bank will accept your application. All applications are subject to status.
